

Bilaga B

Case Reports

- The ideal Lancet Case Report is of general, not specialist interest. It tells a clinical story of a difficult differential diagnosis in an engaging and concise manner, while respecting the dignity of the patient. Novelty is not essential, but at least one broadly useful learning point is. The author should have been involved in the care of the patient.
- Present a diagnostic conundrum, and explain how you solved it. Tell us about the presentation, history, examination, investigations, management, and outcome. In your discussion, educate the reader.
- We do not usually publish reports purporting to show the effectiveness of medical interventions in single cases.
- Use no more than 1000 words and 5 references. Explanatory and graphic pictures (up to a maximum of two) can be helpful.
- Consent for publication in print and electronically must be obtained from the patient or, if this is not possible, the next of kin before submission. See [Patient and other consents](#)
